

## Stationary Coolant Supply

Liquid cooled machinery and equipment have wide variety, like heavy duty applications in mining, precision applications in machine tools or offshore applications in explosion-hazard area. In order to operate your equipment safely and efficient, our coolant supply units are designed for your specific challenge.

### Ready for your application

We engineer and manufacture aggregate for hydraulic- and gear oil as well as water-glycol mixture for cooling, heating and conditioning. Many years of experience in rating heatexchangers, pumps and heater is our basis to design your costum aggregate.
